

FTN-007 - Open Questions and Future Directions

This Is Not a Finished Theory

The FTN framework remains exploratory.

Many important questions remain unanswered.

Open Questions

Measurement

Can FT be quantified?

Can FTC be measured?

Can FTN growth be tracked?

Neuroscience

Do Function Tunnels correspond to identifiable neural structures?

How do FTs relate to plasticity and memory?

Education

How can Tunnel Engineering be systematically implemented?

How can FT growth be evaluated?

AI

Can AI autonomously construct FTNs?

Can AI develop FTC?

Can Human-AI FTNs be optimized?

Society

How do FTNs influence social mobility?

How do FTNs shape institutions?

How do FTNs evolve across generations?

Future Vision

The long-term vision of this work is not merely to understand intelligence.

It is to understand how intelligence grows,

specializes,

connects,

and co-evolves across humans, AI systems, and future civilizations.
